Organize

Innovation Content Management: Streamline the process of creating, sharing, and accessing innovation content, ensuring that relevant information is readily available to the right people when needed.

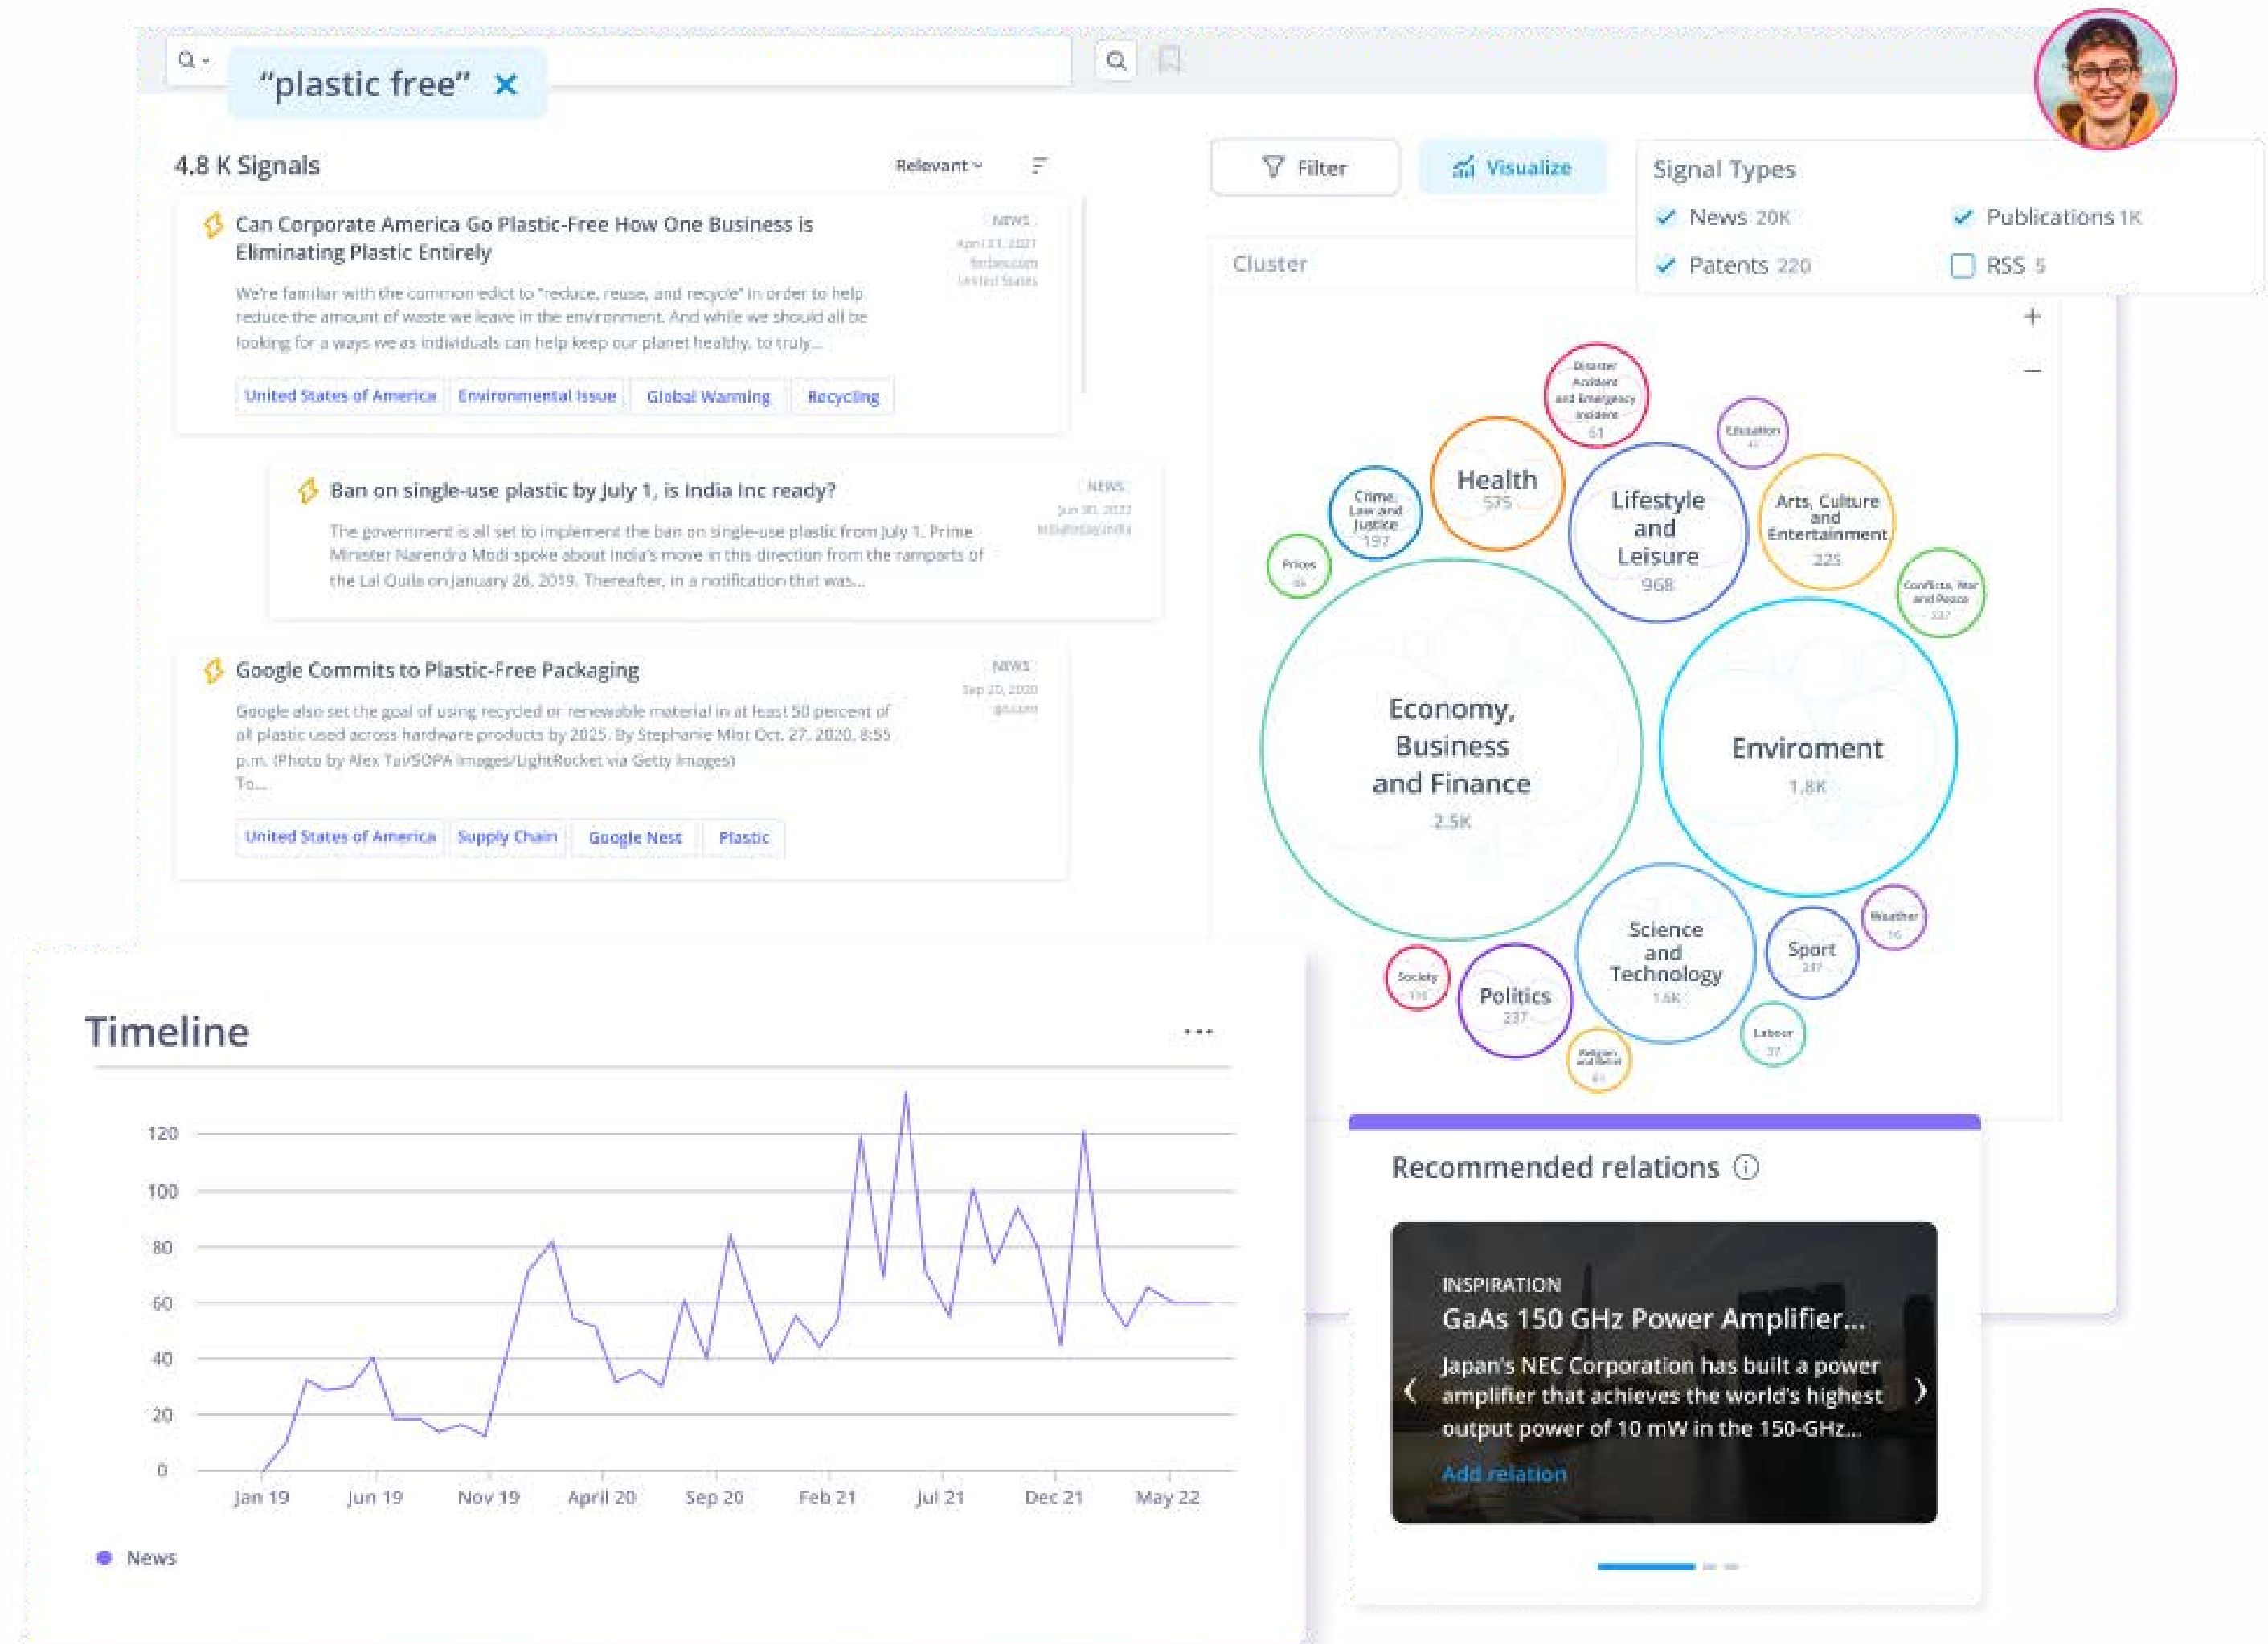

Templates: Quickly start with proven templates or customize them to fit your unique needs or organizational requirements.

Highly Customizable: Modify your information capture, workflows, evaluation criteria, and user roles to meet your unique requirements.

Search and Filter: Effortlessly explore millions of data points. Quickly locate specific information and effortlessly share your filtered views with colleagues.

The screenshot displays the Itonics Innovation Management interface. At the top, there is a search bar and a series of filters: 'Element Types' (set to 'Trend and Technology'), 'Status' (set to 'Published'), 'Created By' (set to 'Select Option'), and 'Updated' (set to 'Select Option'). A 'More Filters' button and a 'RESET' button are also present. Below the filters, a grid of 234 elements is shown, each with a thumbnail image and a title. The elements are categorized by 'TTC TECHNOLOGY' and 'INO INNOVATION PROJECT'. The 'TTC TECHNOLOGY' elements include 'Wearable XR' and 'Human Machine Interaction in Automotive'. The 'INO INNOVATION PROJECT' elements include 'Climate Resilient Crops' and 'AID-Connect: Centralised Healthcare Information'. A modal window titled 'Workspace Element Types' is open, showing a list of element types: 'Company', 'Idea', 'Inspiration', 'Opportunity' (highlighted), 'Project', 'Risk', 'Scenario', and 'Technology'. Another modal window titled 'OPP Opportunity' is open, showing a 'Relations Widget' with a list of relations: 'Implements', 'Implemented By', 'Hindered By', 'Part Of', and 'Hinders'. Below the modal windows, a 'Project Phase' section shows a progress bar with six stages: 'Concept & Bu...', 'Planning', 'Development', 'Testing' (highlighted), 'Launch', and 'Scale'.

Discover

Search an Expansive Database: Save time by utilizing our advanced filtering capabilities, which boost the relevance of signals and automatically tag them by topic using machine learning.

Integrations: Use APIs to seamlessly sync with 3rd party tools to enhance your content and keep it up to date.

Recommendations: Get relevant content suggestions to make sense of your data, understand interdependencies, and find suitable experts on the platform.

Automate

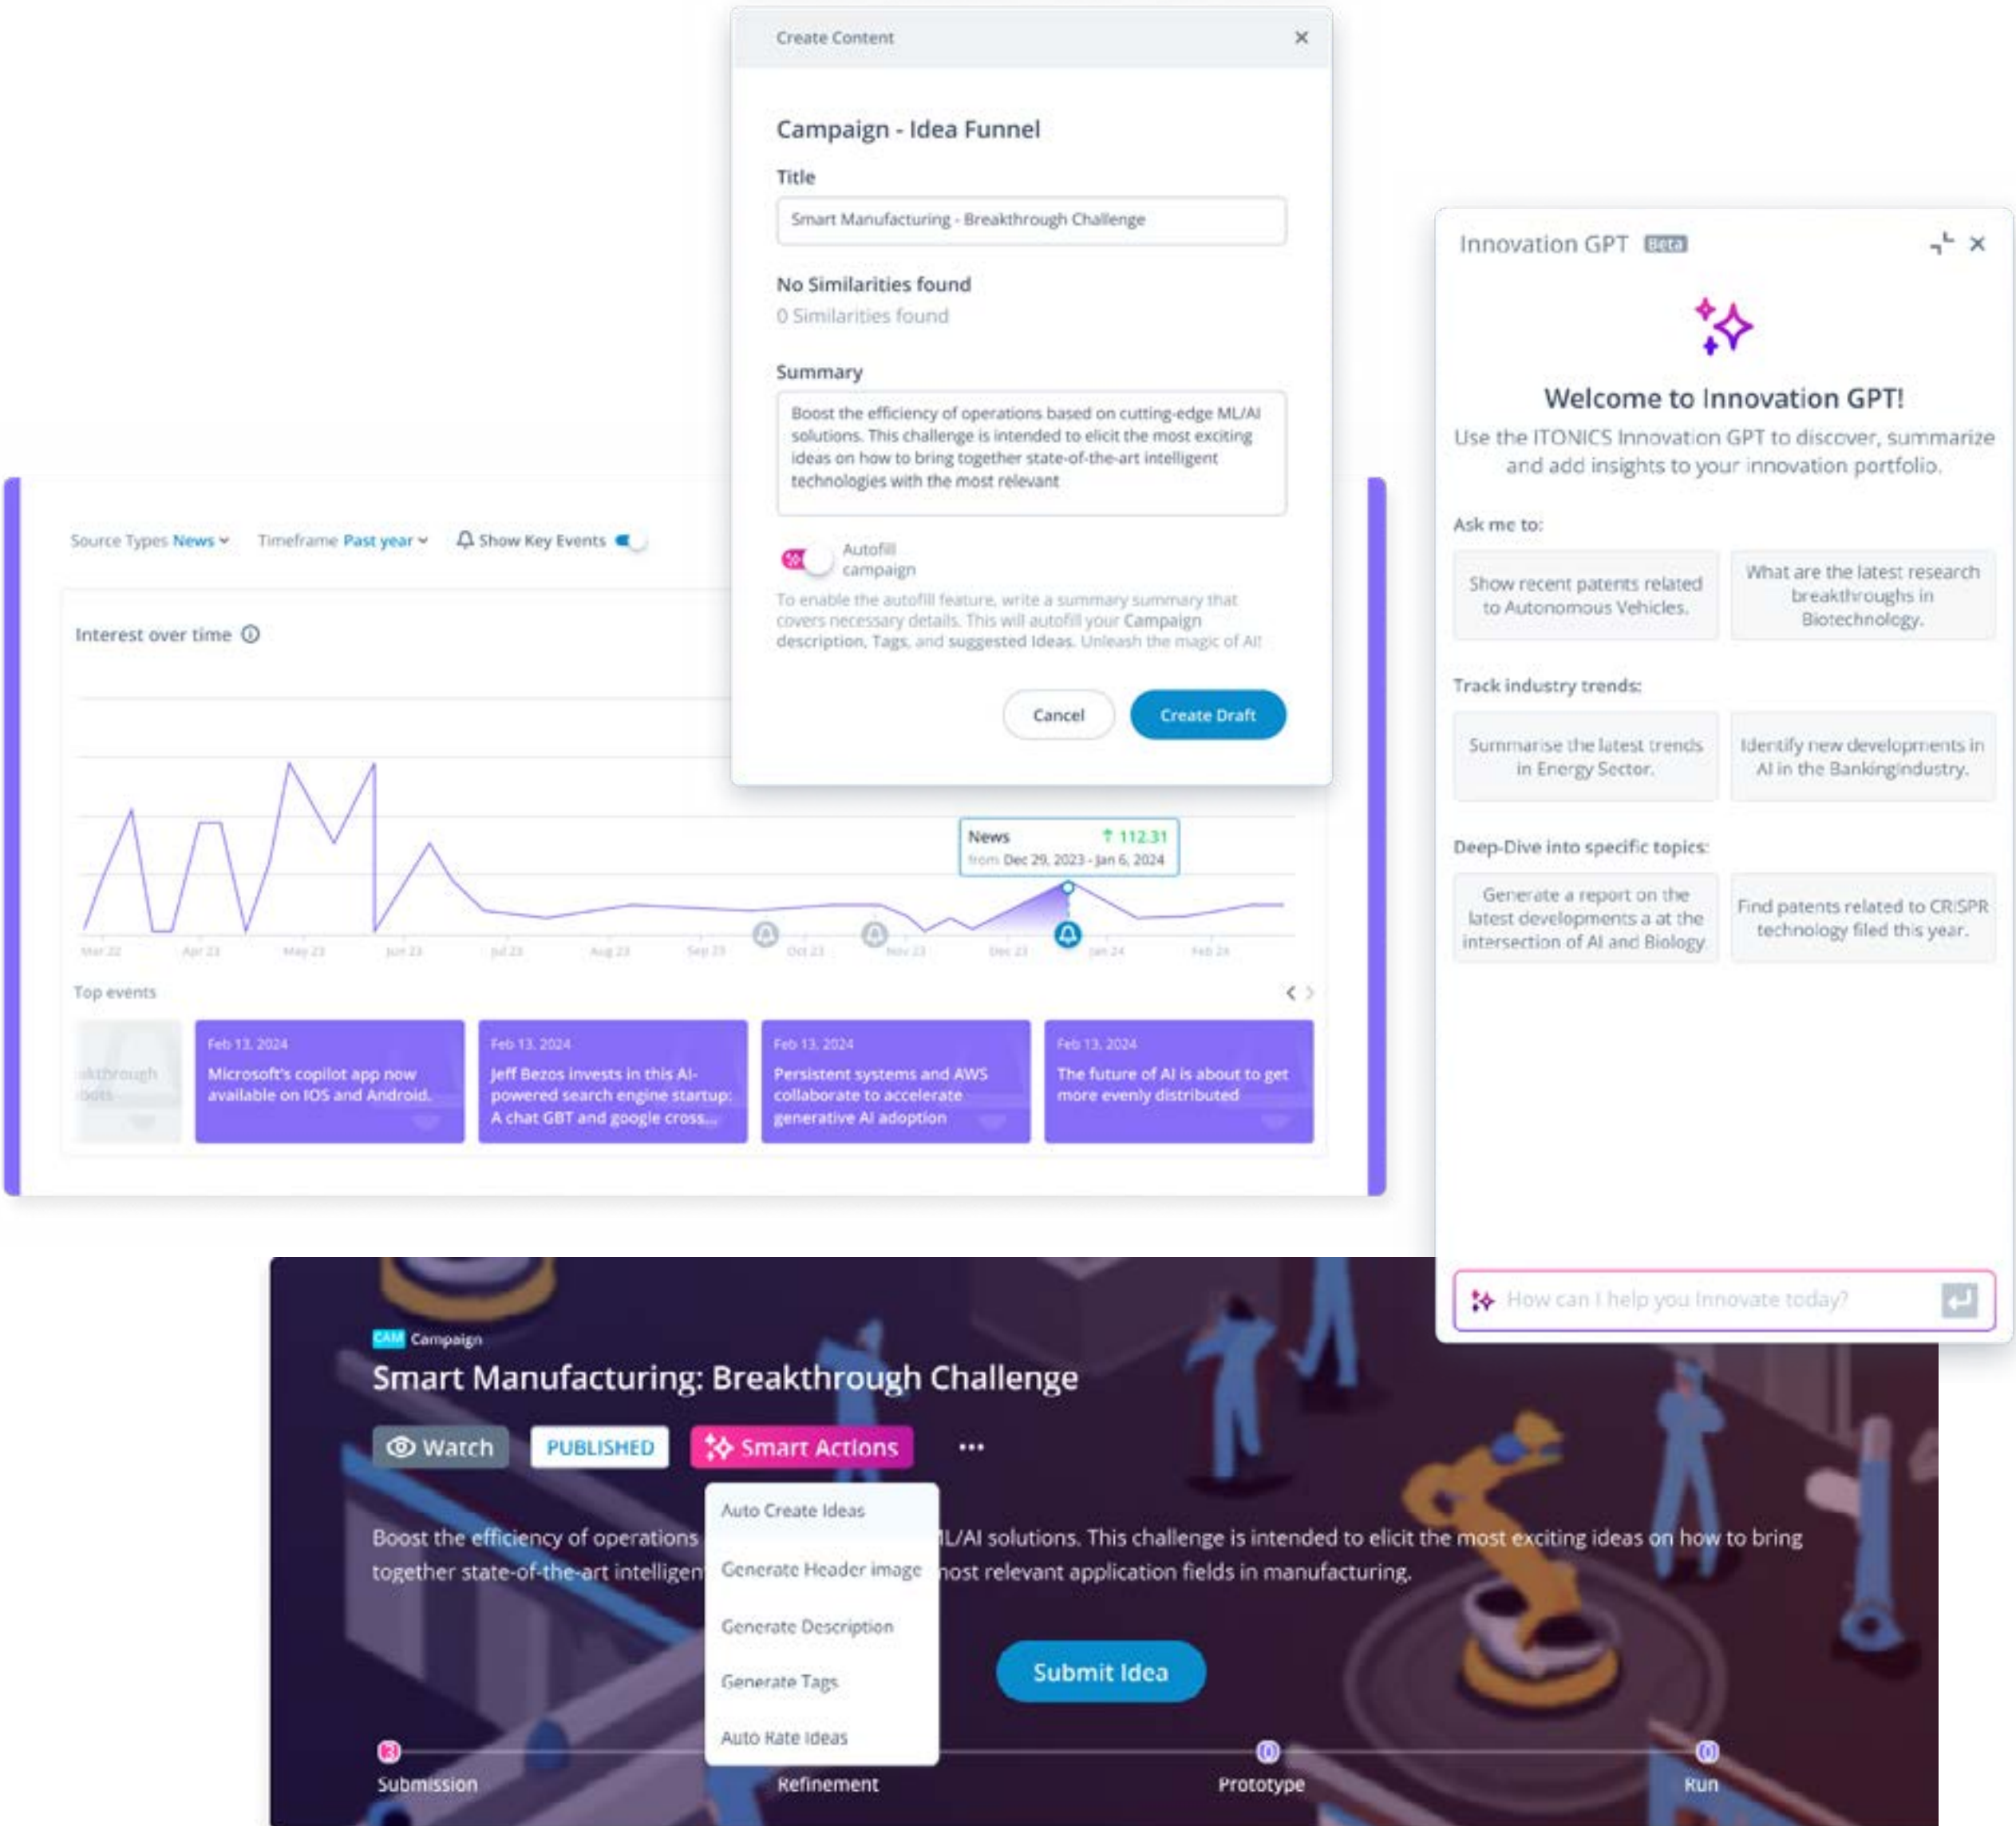

Automate Your Monitoring: Achieve more with less effort by receiving inbox notifications highlighting crucial developments in your areas of interest.

Effortlessly Process Information: Aggregated data clusters swiftly reveal why developments happen so you can easily identify what matters most.

Leverage GenAI: Quickly generate content descriptions with GenAI's guided prompts, saving you time and revolutionizing ideation!

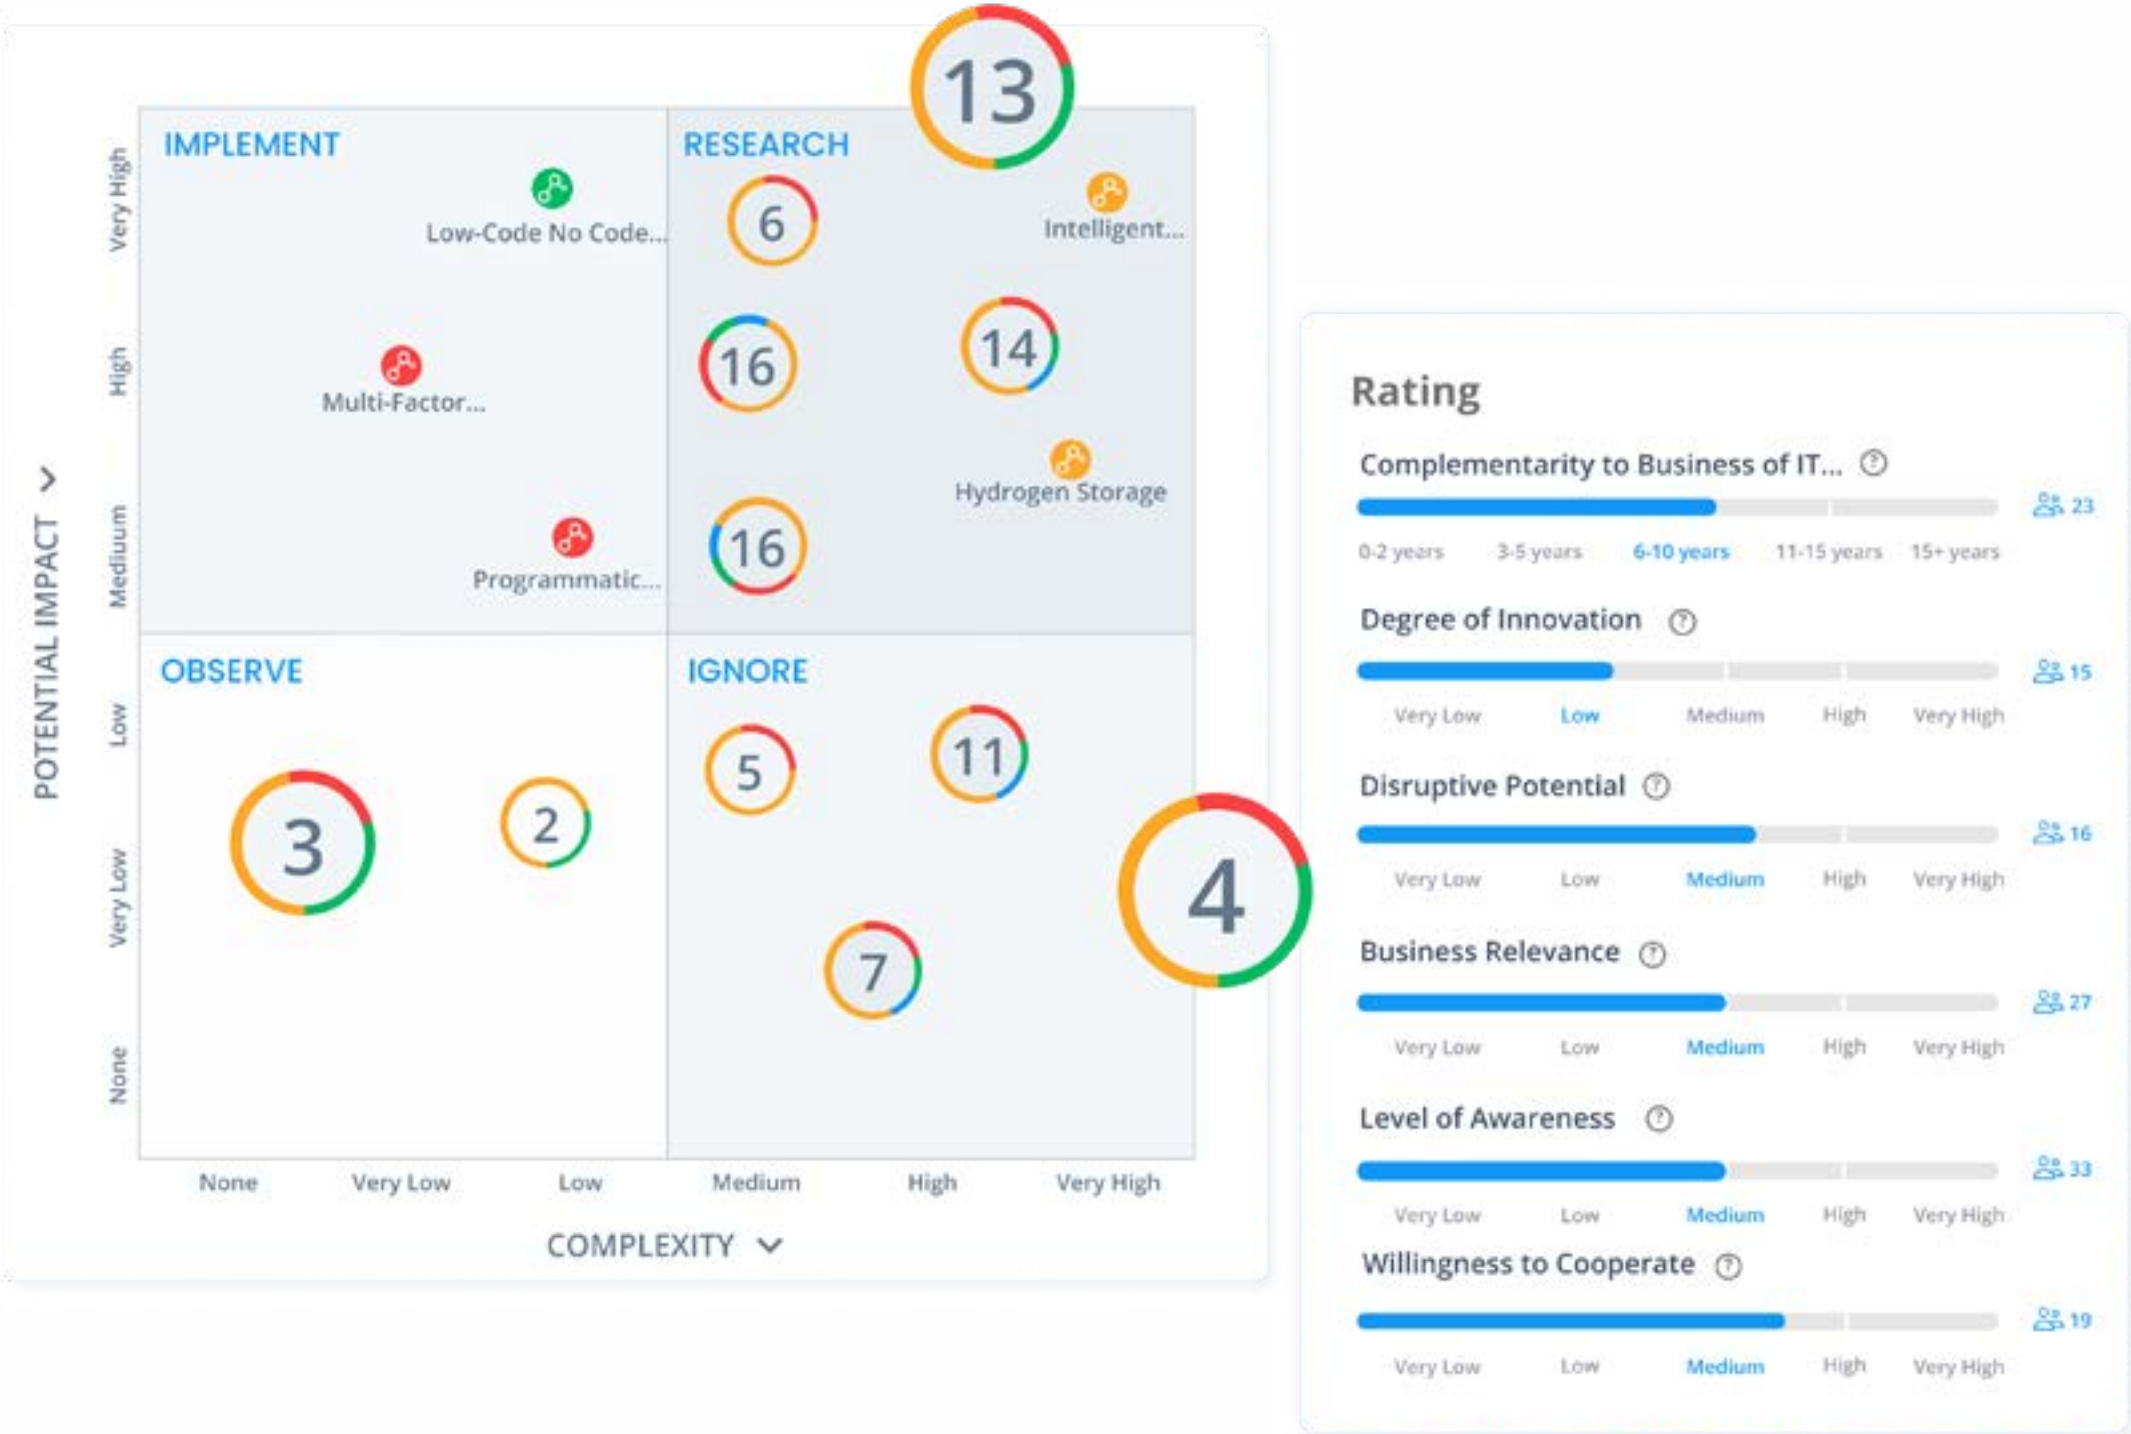

COMING SOON

AI Innovation Manager: The integrated InnovationGPT helps you speed up your tasks.

Analyze

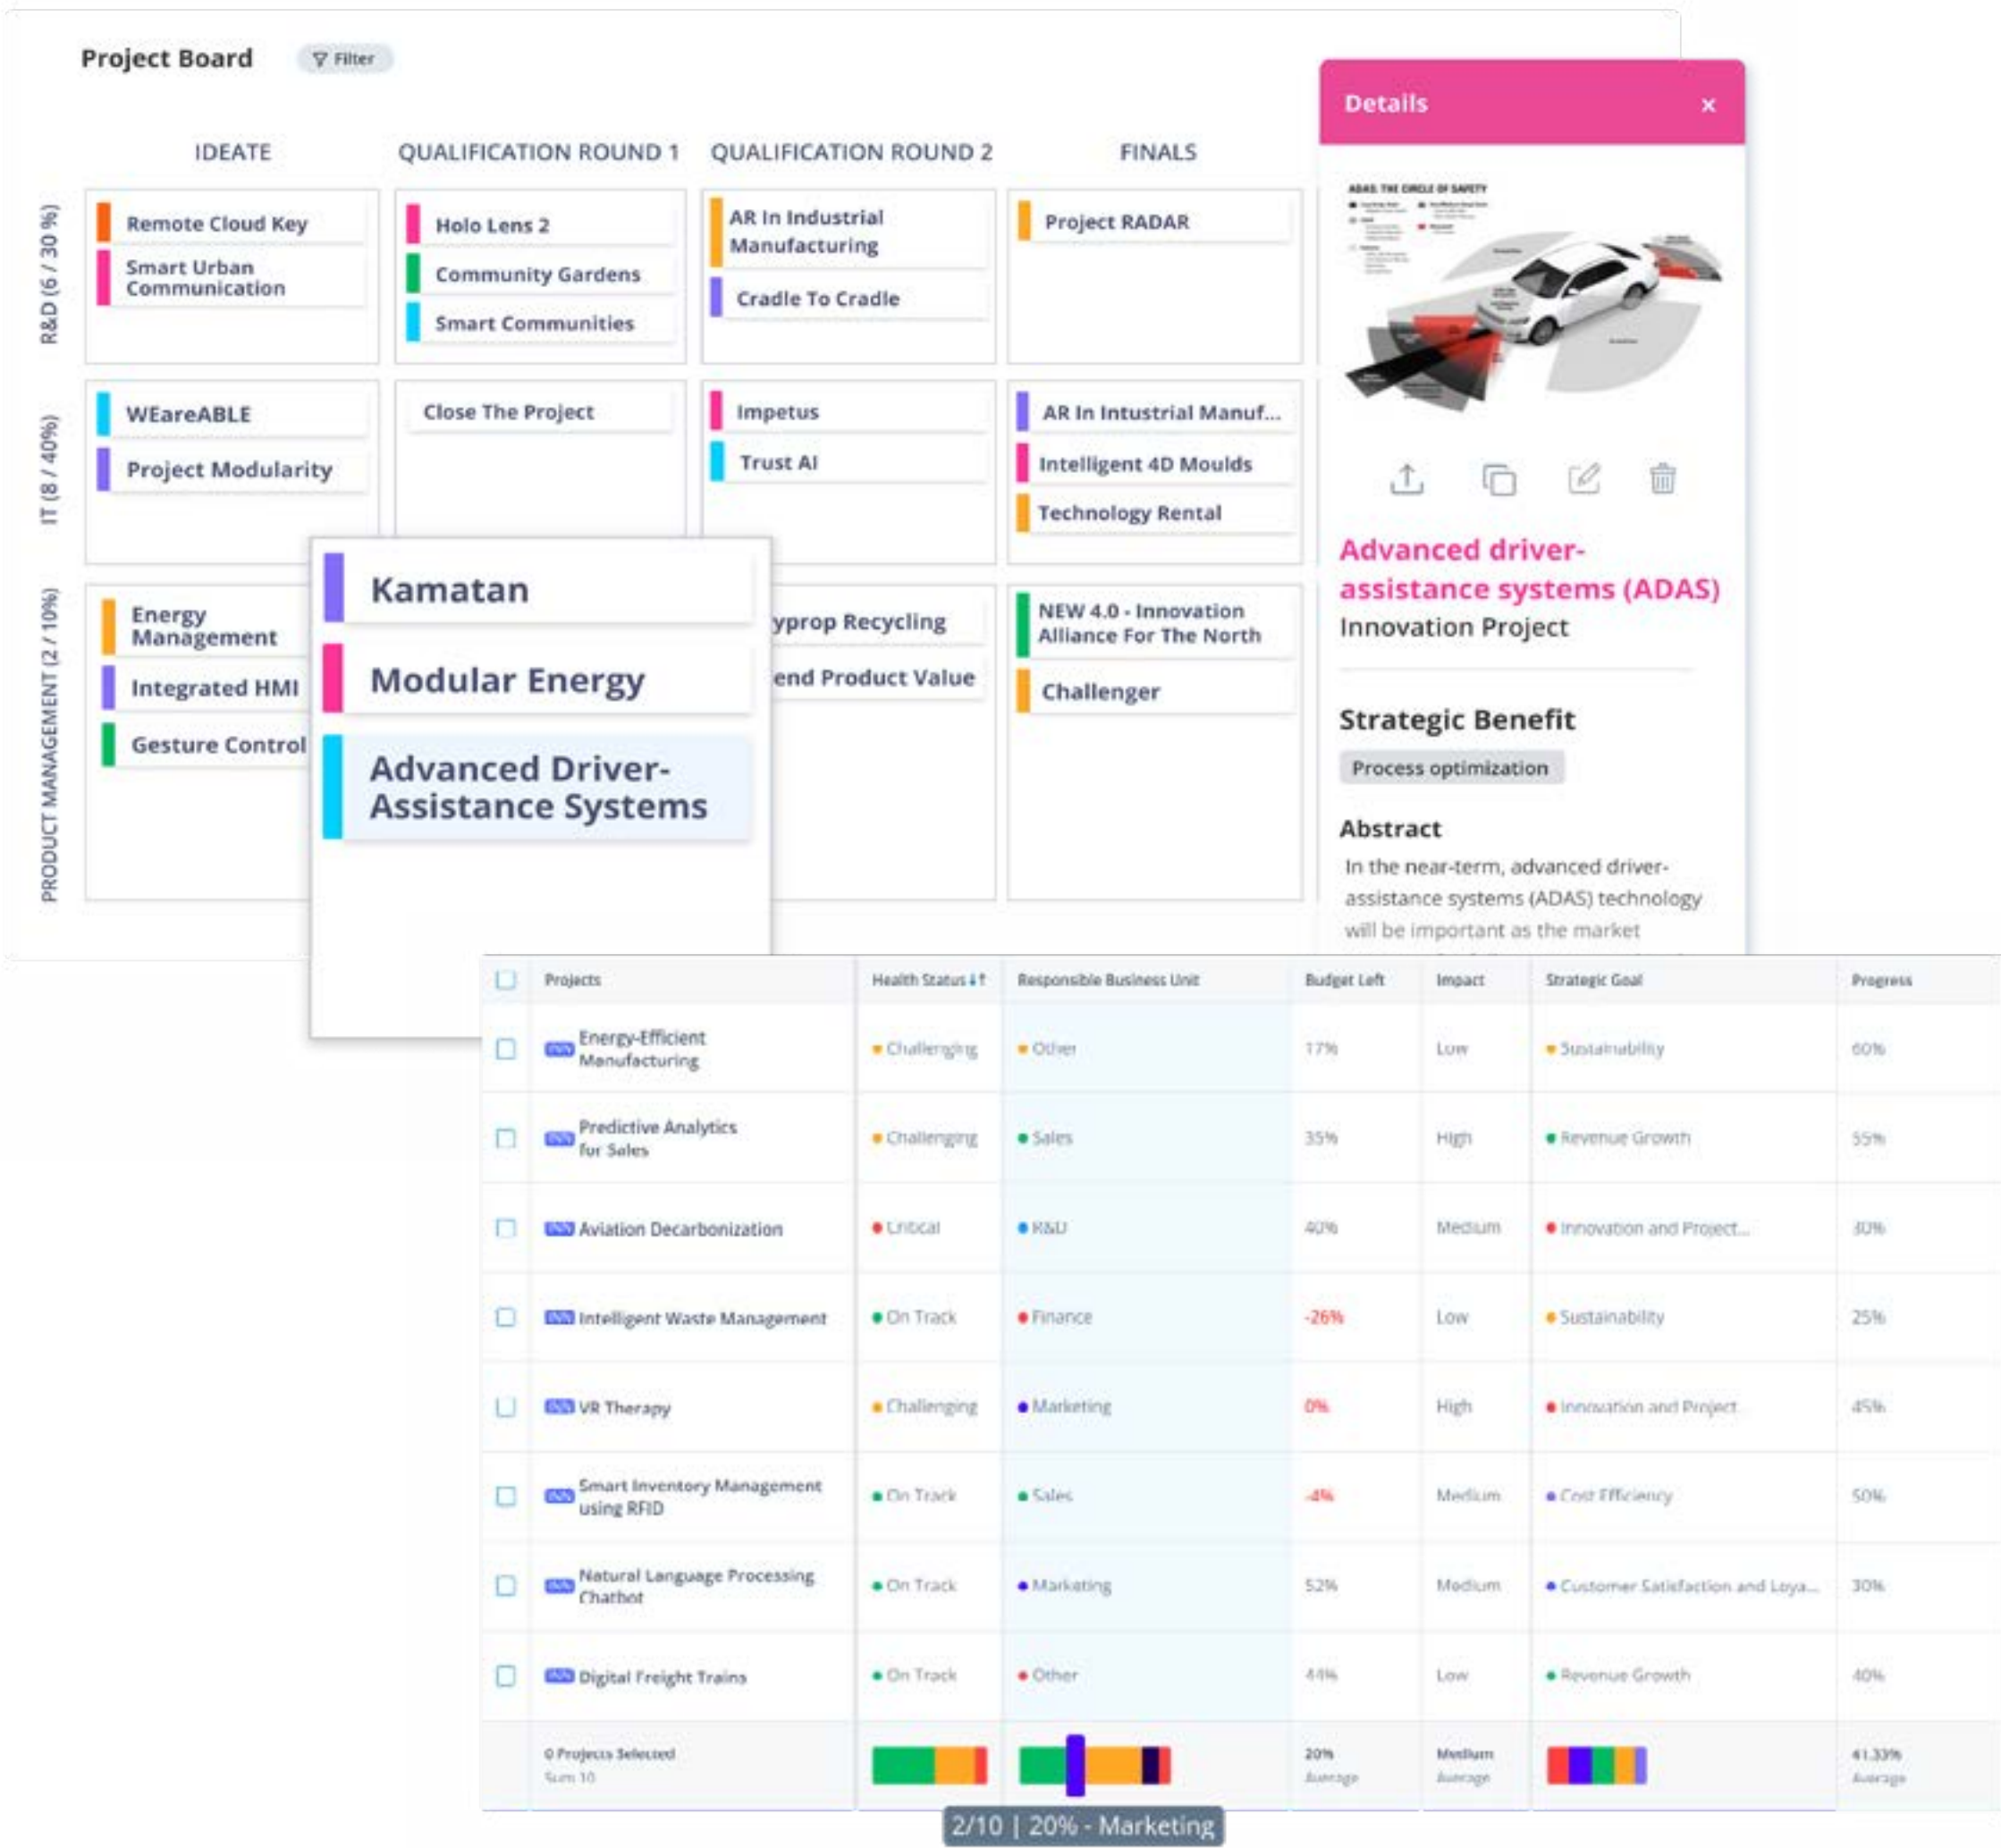

Radar View: Understand the forces shaping the future and make sense of your data.

Collaborative Rating: Accelerate decision-making by collectively evaluating drivers of change, ideas, or projects.

Matrix View: Optimize your portfolio by evaluating risk and potential.

Align

Innovation Roadmap: Turn strategy into action by planning innovation activities and tracking their progress.

Kanban Board: Move projects, ideas, startups, and more through a workflow, and easily track their status in one view to maximize efficiency.

Effortlessly Oversee Your Portfolio: Bid farewell to juggling spreadsheets, slides, and documents. Welcome a centralized portfolio view, empowering effortless action execution.

Collaborate

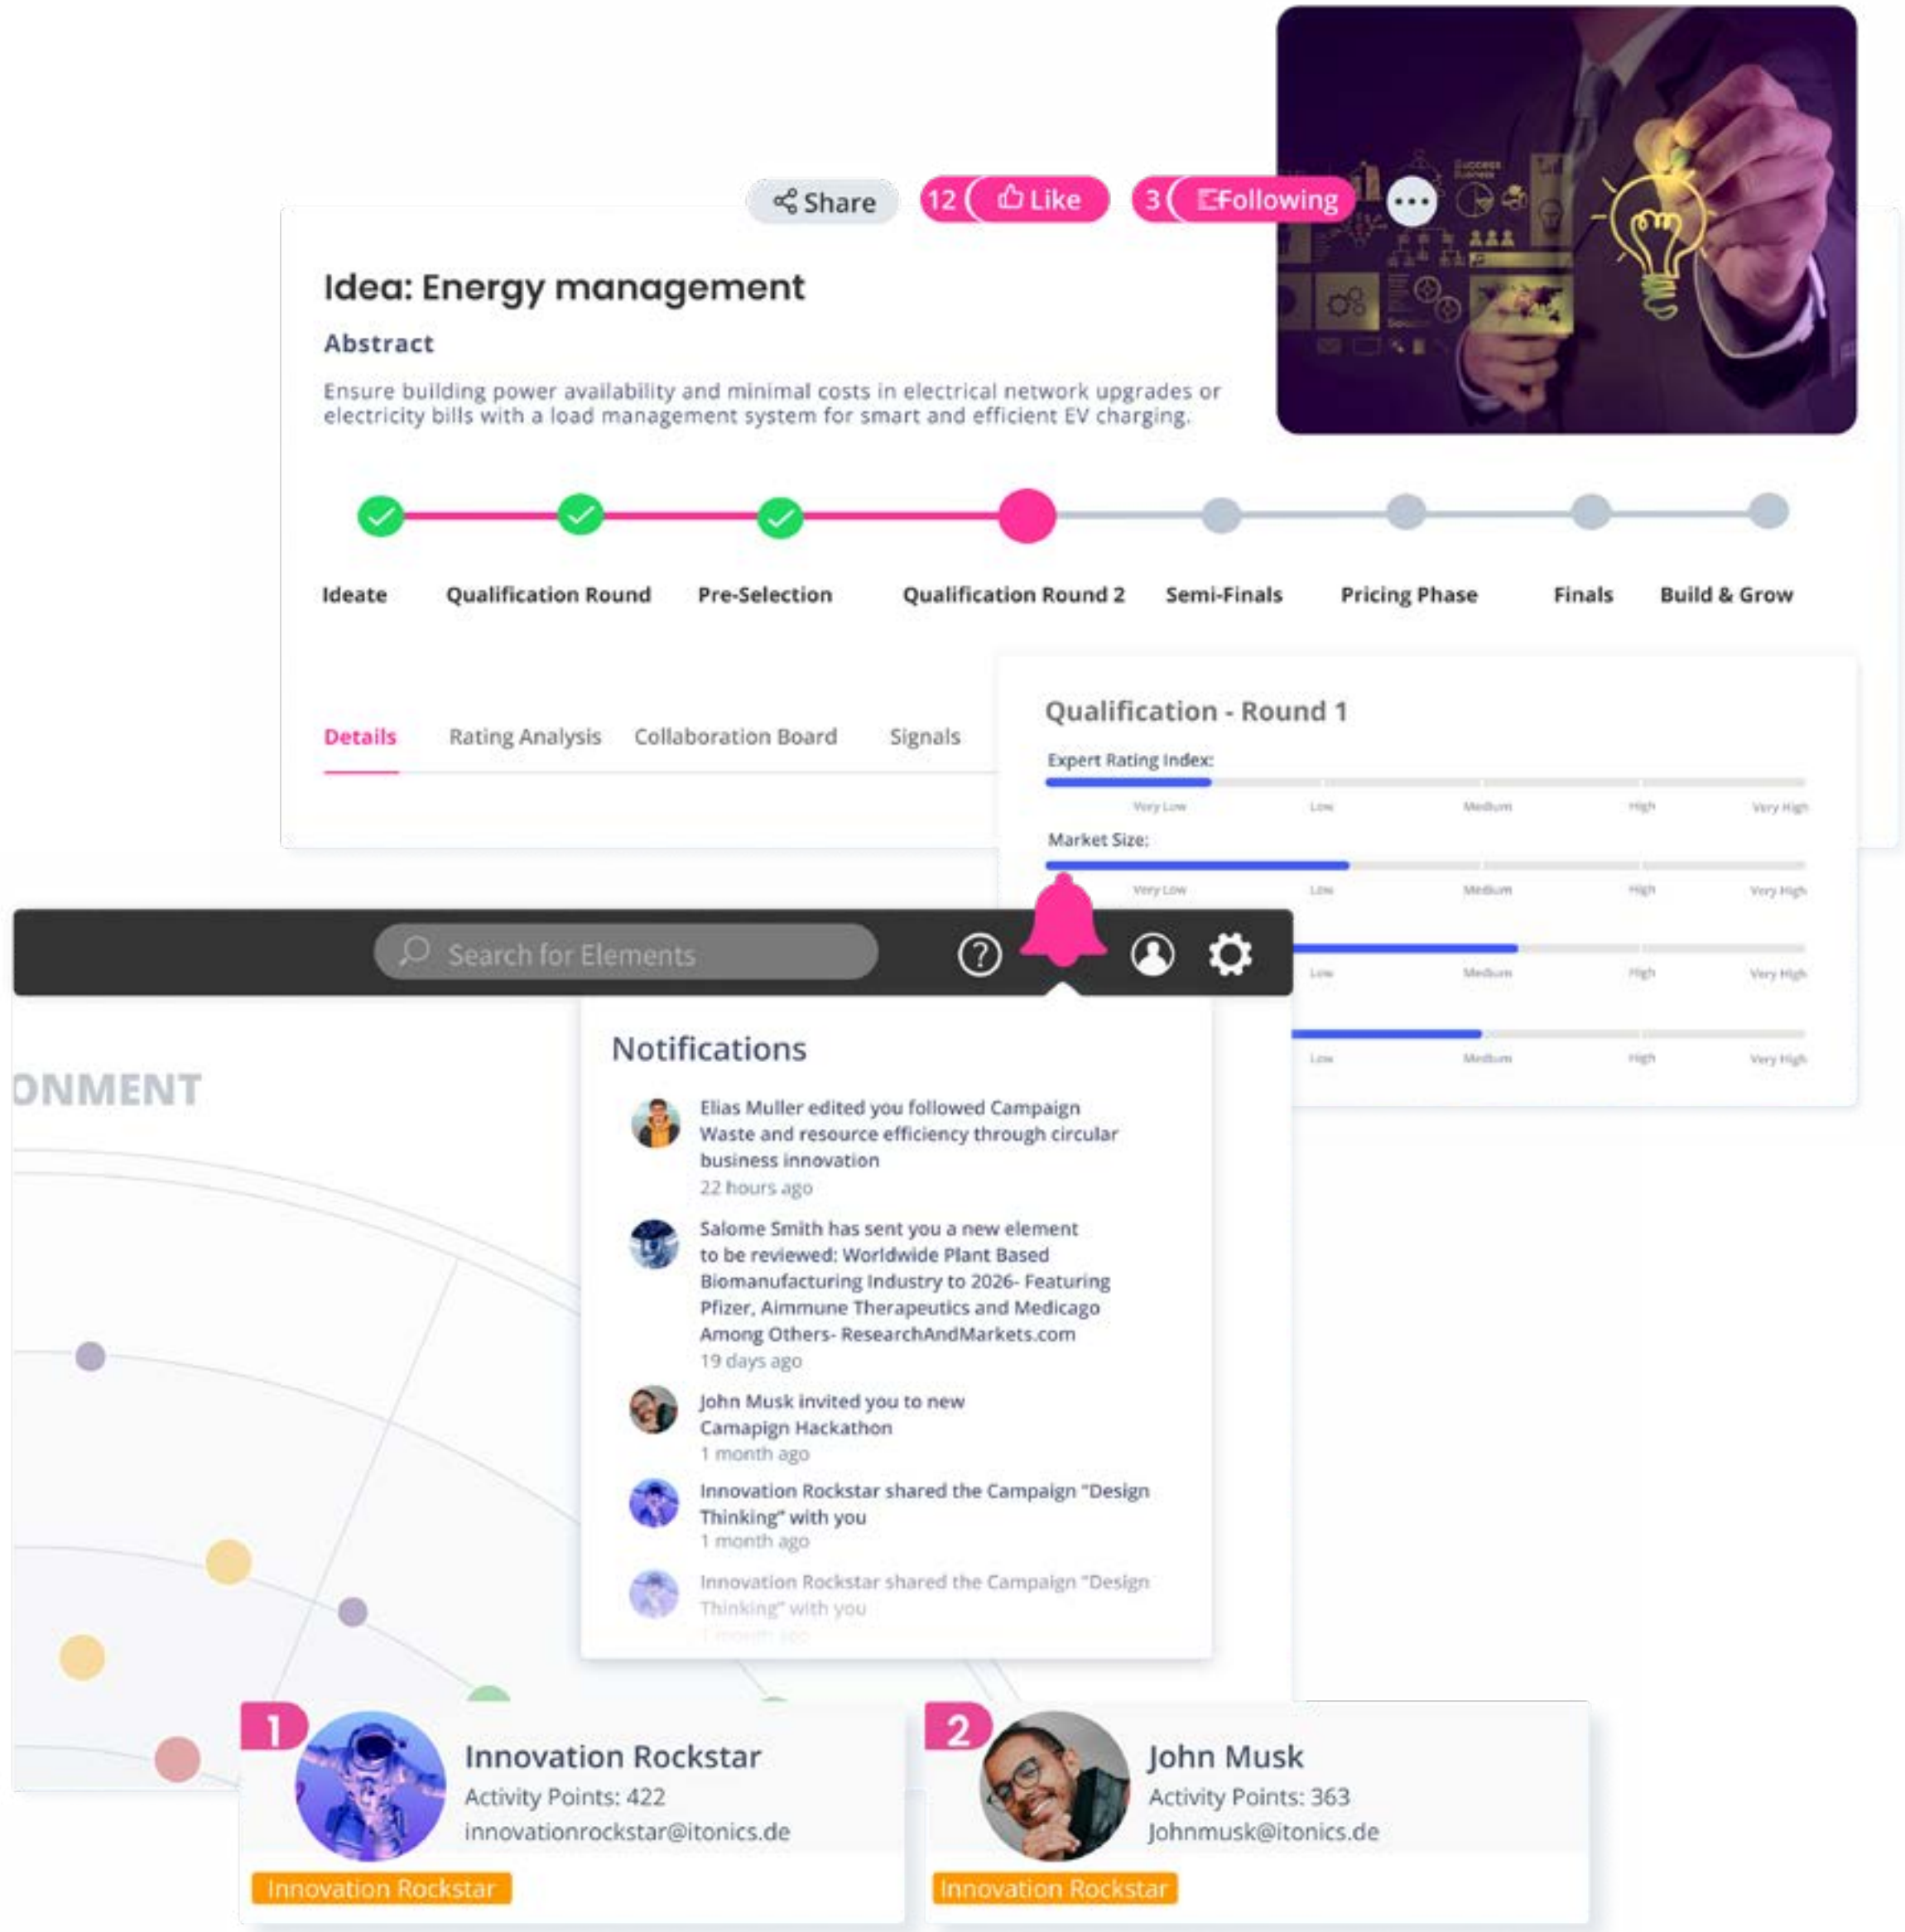

Ideation Campaigns: Collect and develop winning ideas from anyone, anywhere.

Gamification: Incentivize and motivate your whole organization to participate and collaborate.

Notifications & Alerts: Keep users informed of relevant developments and new activities.

Community Engagement: Enable team members to share their opinions, discuss and collaborate.

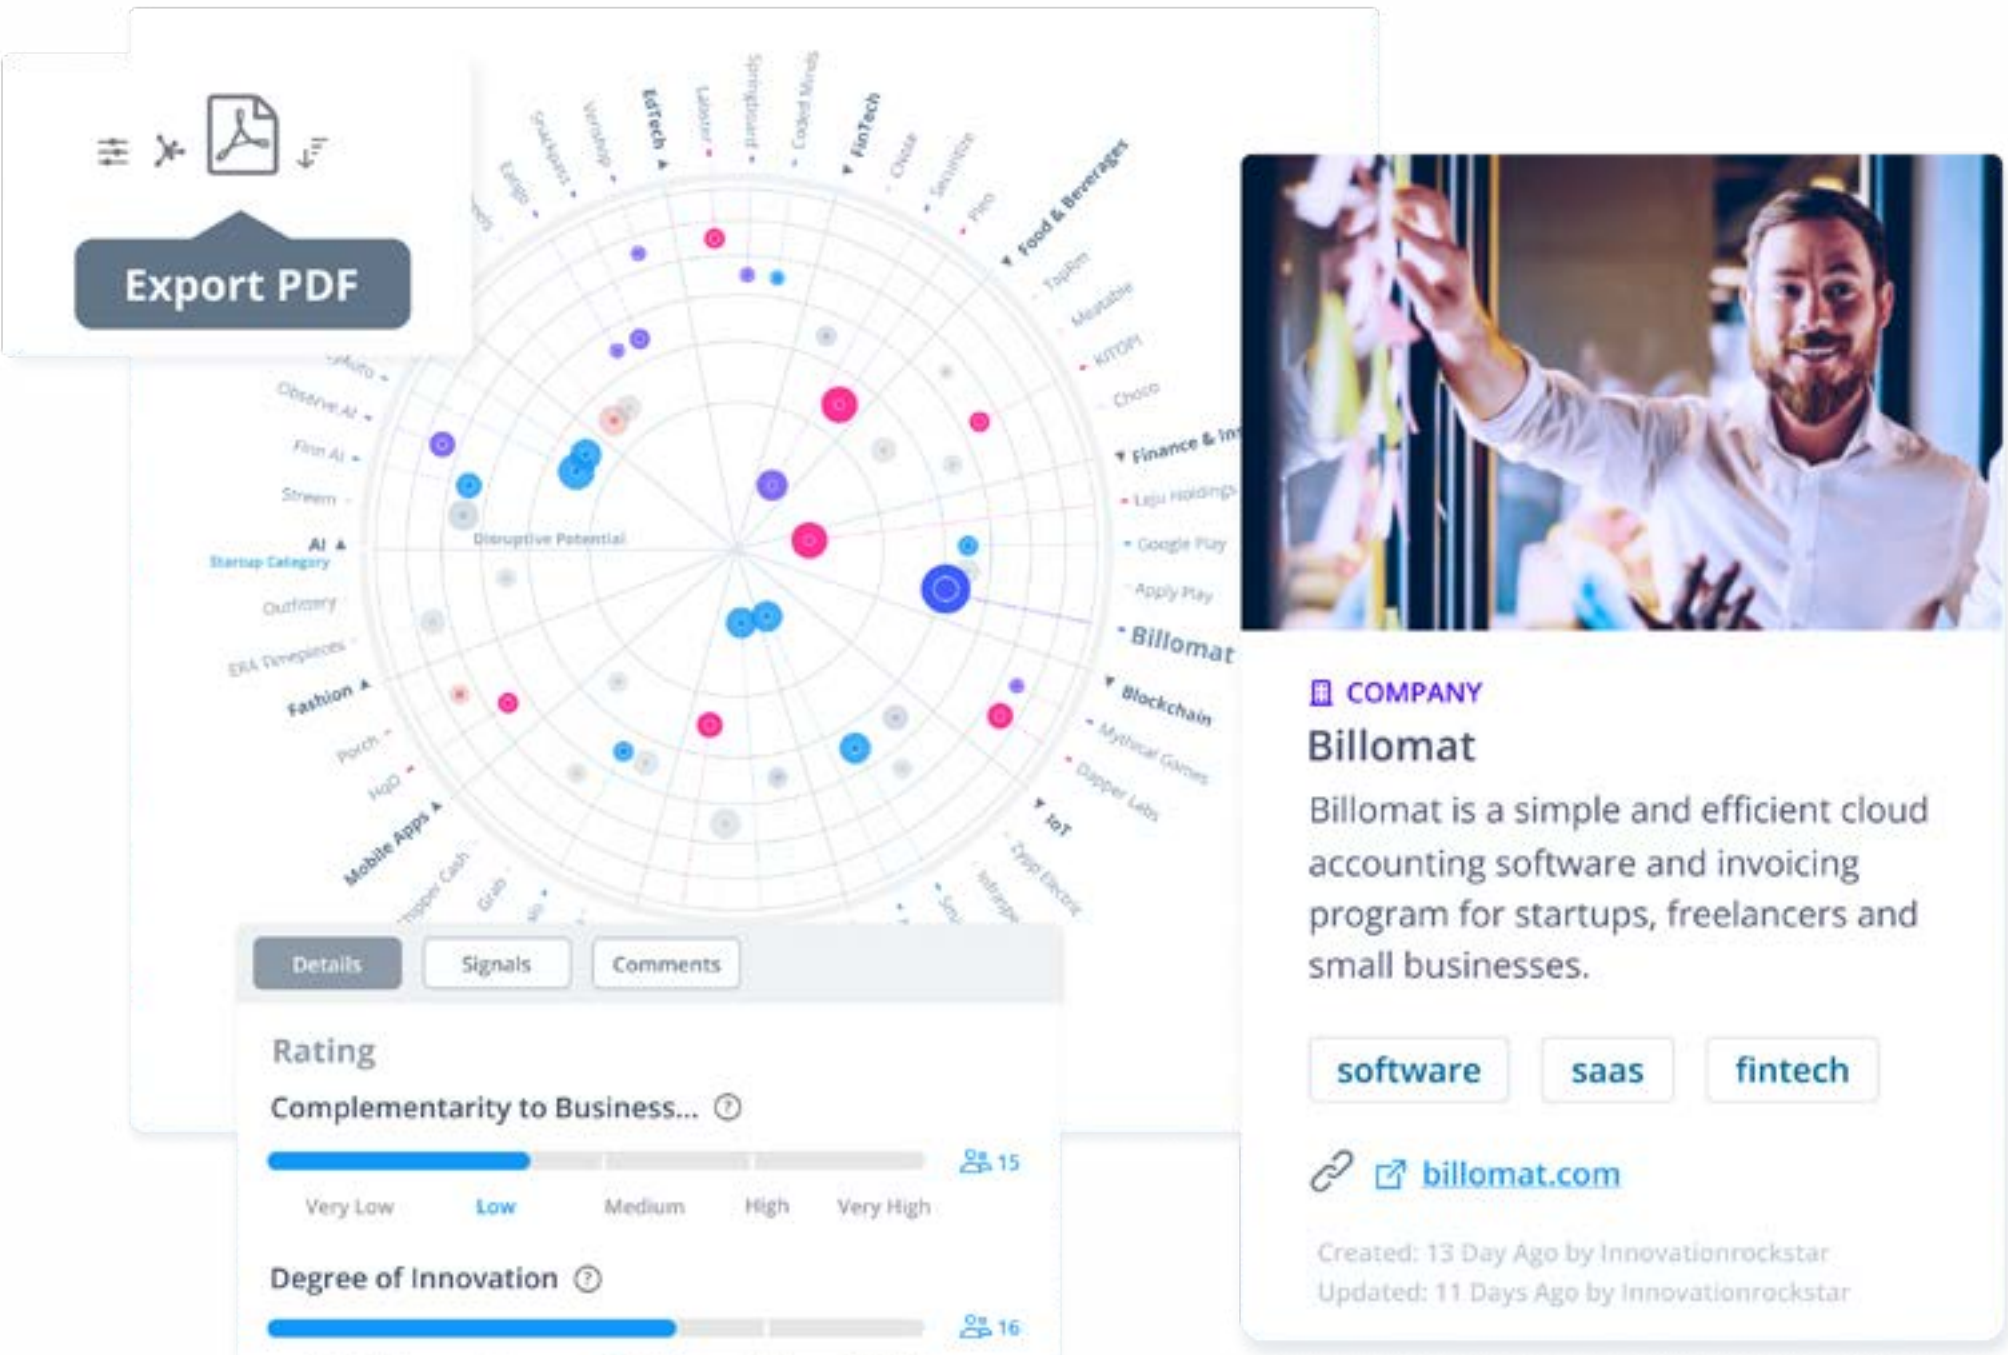

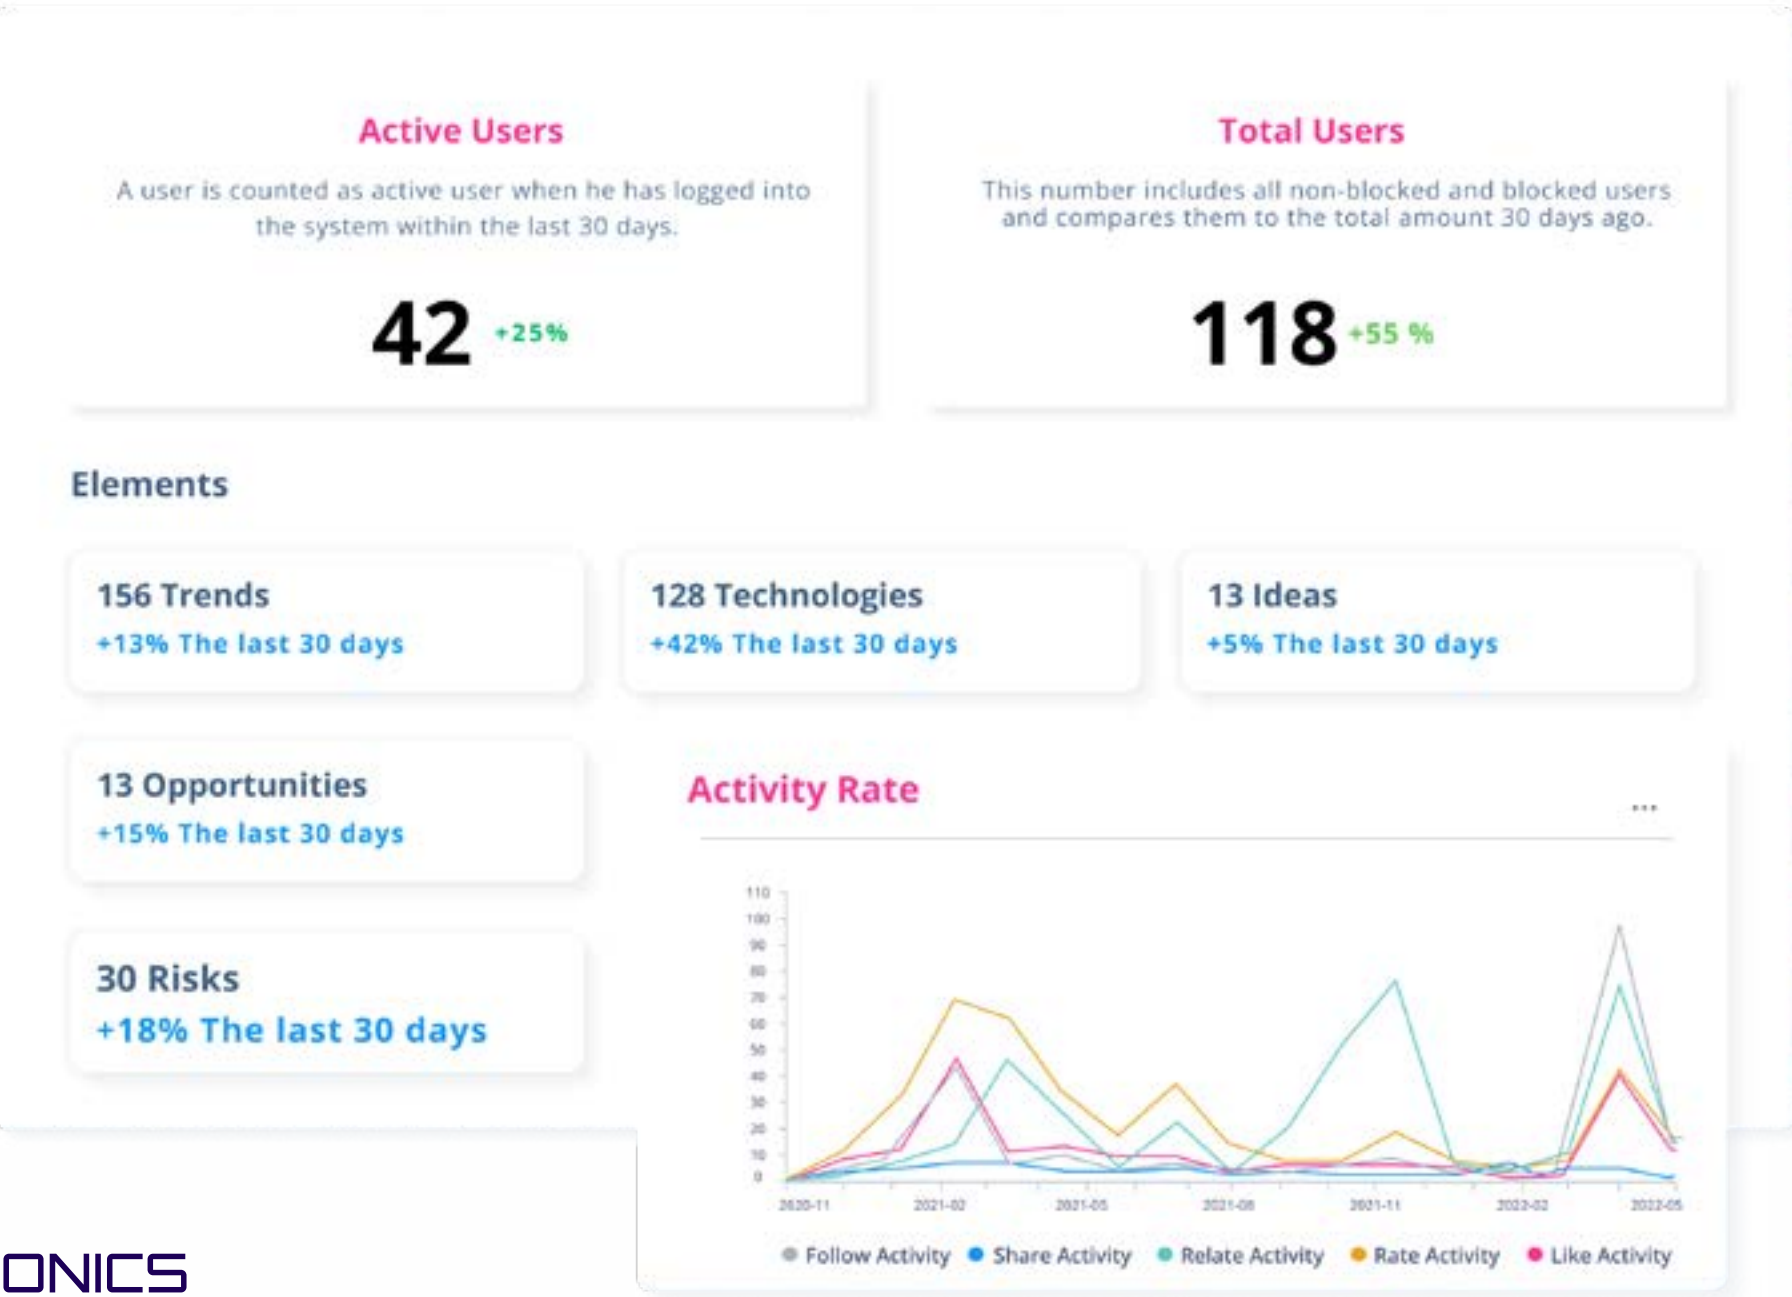

Interactive Views: Allow your teams, customers, and stakeholders to engage with real-time radar insights.

Report

Visualizations: Analyze your data in interactive graphics to uncover opportunities, optimize your portfolio, and drive progress.

Dashboards: Configure reports to get an overview and keep your stakeholders informed.

Export: Add your insights to reports, and presentations or process them off-platform.

Embed: Display findings on a webpage or intranet to people without system access.

Govern

User Management: Control user roles, permissions and access to suit your use case.

Security & Privacy: Ensure your users log in securely and conveniently on a platform with world-class information security.

Toyota

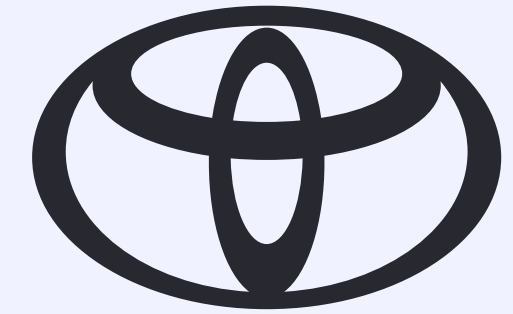

Toyota Motor Europe is using **ITONICS** to bring together manufacturing centers in Europe and empower innovation.

“Targeted innovation requires a “single point of truth”, a single source of information to guide people and to make it easy for them to find what’s going on in our organization.

The ITONICS Innovation OS is such an environment, bringing together more than 500 Toyota members from our European manufacturing centers on one digital ecosystem.”
