

# Technology Radar Instructions

What's on your radar?

## How to use this template?

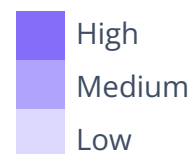

Use this template in workshops or decision-making sessions to map existing and emerging technologies that are relevant to your business environment. Quickly identify priorities and inform decision-making related to your technology portfolio.

Invite collaborative input to determine where to map technologies on the radar:

- 1. Technology segmentation:** In what segment does the technology sit?

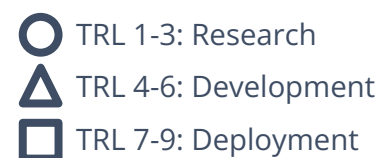

*\*Before downloading this template, you can customize the technology segmentation on the next page.*

- 2. Potential impact:** What is the potential impact of the technology on your business?

**Tip:** Technologies nearest the center have the highest potential impact!

- 3. Technology Readiness Level (TRL):** How mature is the technology in the market?

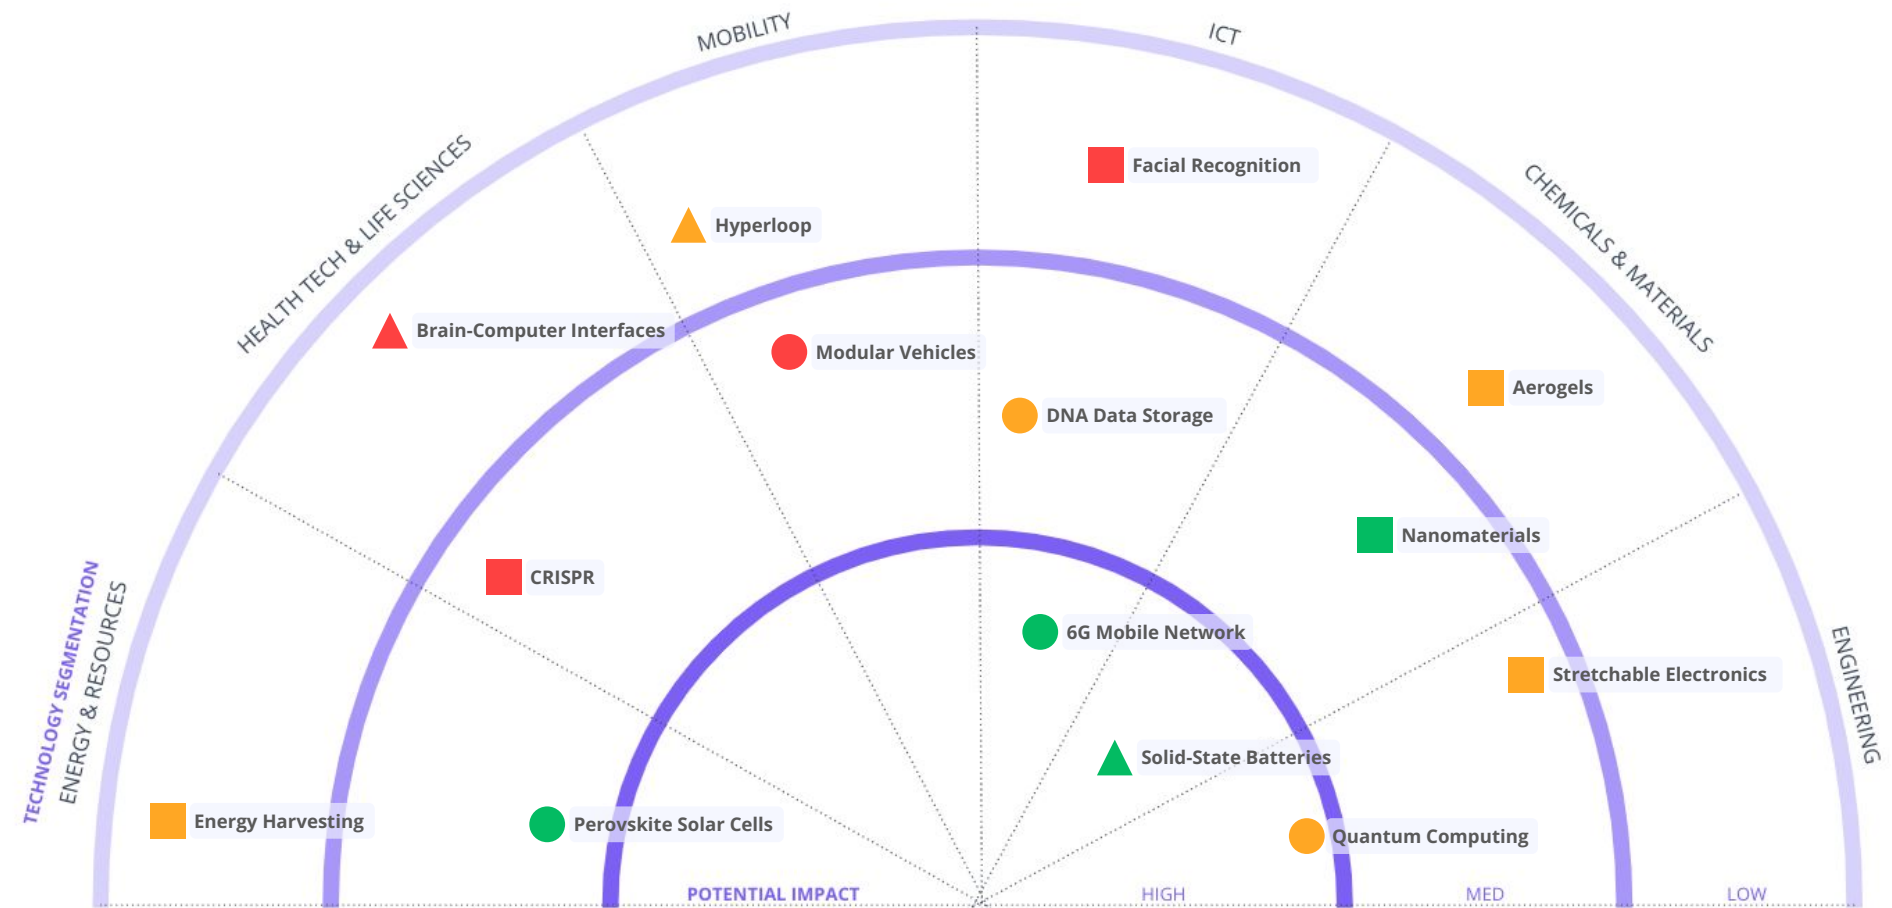

**Tip:** Use these symbols to represent technologies across the TRL scale.

- 4. Consider other evaluation criteria,** such as technology attractiveness, internal know-how, or need for action. For example:

**Need for Action:** How urgent is it for your company act on the technology?

**Tip:** Use color or size to represent additional evaluation criteria.

## What's next?

**Digitize:** Once you've mapped your company's technology landscape on the radar template, capture the results in the accompanying [sheet](#).

Import this sheet into the [ITONICS Innovation OS](#) to bring your radar to life in a dynamic, interactive visualization.

**Analyze:** Analyze your identified technologies in context alongside market trends, customer needs, and competitive action to uncover new insights.

**Report:** Share your tech radar and analysis with stakeholders in your company to inform [opportunity](#) and technology strategy development.

## Get started

- 1. Customize** the technology segmentation on the template on page 2 to align with your company's tech domains.
- 2. Download** and print the template on page 2 (recommended in size A3 or larger to make it easy to use in your workshop).  
  
Download the accompanying sheet for digitizing your results.
- 3. Try** ITONICS Innovation OS for free to see the technology radar in action!
